Deployment Instructions

Option 1: GitHub Pages (Recommended - Free)

1. Create a new GitHub repository

2. Upload all files from `website_assets/` to the repository
3. Go to Settings → Pages
4. Select "Deploy from a branch" → "main" → "/" (root)"
5. Your site will be live at `https://yourusername.github.io/repositoryname`

Option 2: Netlify (Alternative - Free)

1. Drag and drop the `website_assets` folder to netlify.com/drop
2. Get instant live URL

Option 3: Local Testing

1. Open `index.html` in any web browser
2. Test all functionality before deployment

Customization

Update Calendly/TidyCal Link

In `script.js`, replace the alert with your booking link:

JavaScript

```
window.location.href = "YOUR_CALENDLY_LINK_HERE";
```

Update Social Links

In `index.html`, update the footer links:

- Instagram: Already set to https://www.instagram.com/_s.mariama/
- LinkedIn: Update the LinkedIn URL
- Add WhatsApp click-to-chat link
- Add Fiverr profile link

Update Sitemap

In `sitemap.xml`, replace `YOUR_GITHUB_PAGES_URL_HERE` with your actual domain.
